 \blacksquare MEP sur site Ameli.fr chez les répondants Démomed : 16 %

■ MEP déclaré dans le questionnaire Démomed par les répondants :

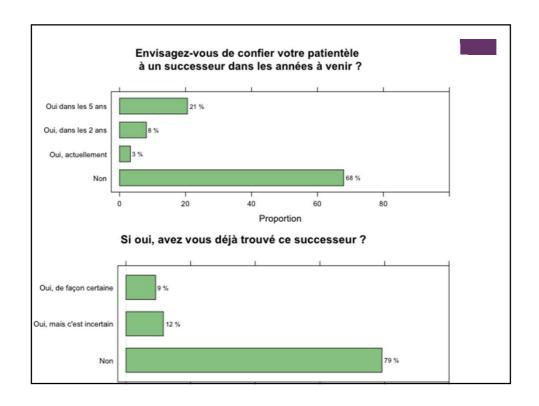

■ 35% MEP au total

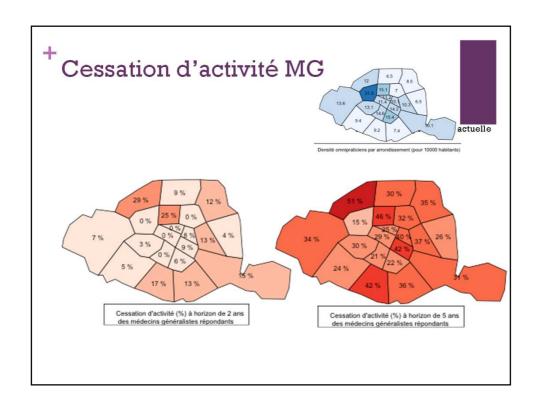

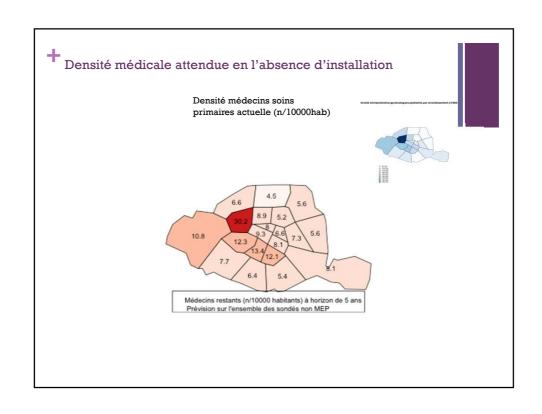

Profil des médecins déclarant une cessation d'activité

- Spécialistes >> généralistes
- Plus âgés...: moyenne 63,4 ans (versus 56,4 ans ensemble des médecins sondés)
- Exercice isolé: 51% (versus 46%)
- Secteur 2:52% (versus 41%)
- Activité clinique :
 - Nombre patients médecin traitant : moyenne 946 (versus 926)
 - Nombre consultations par an plus faible : moyenne 3115 (versus 3428)

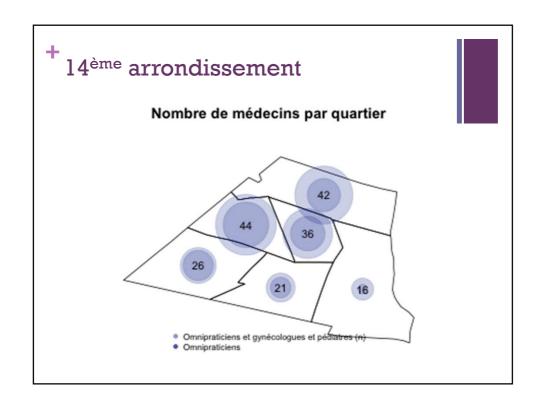

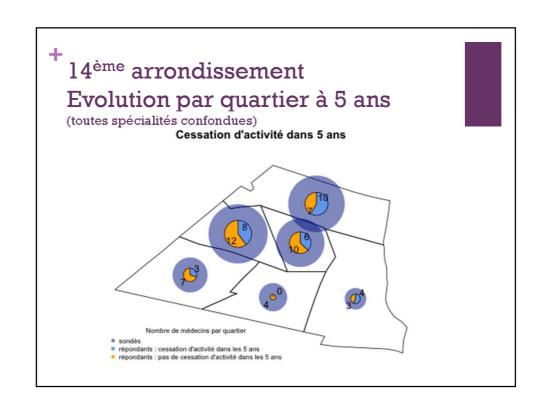

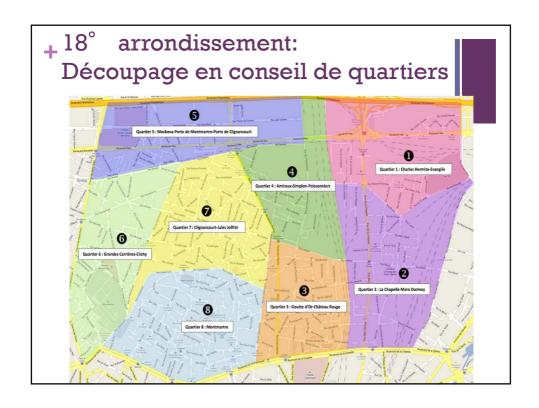

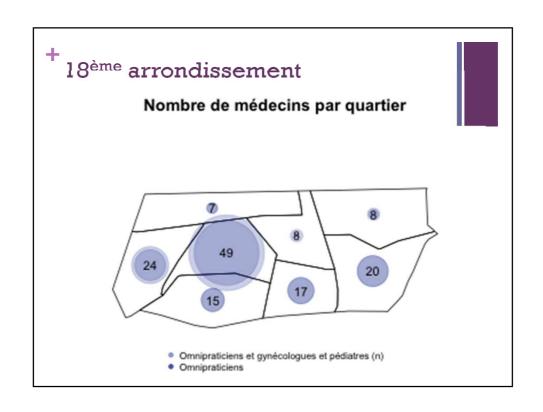

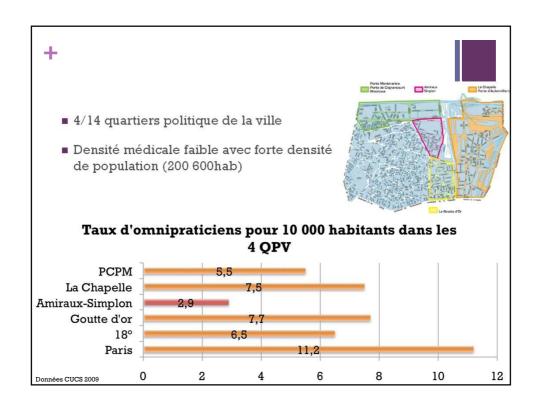

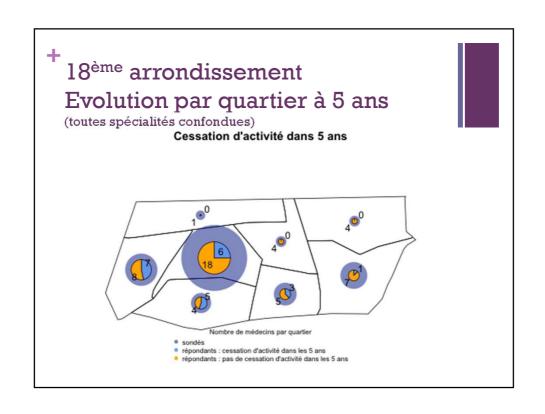

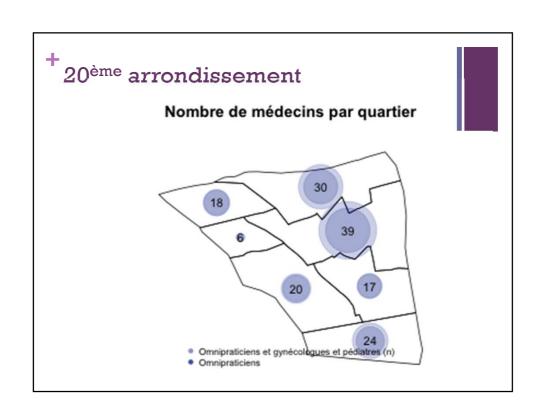

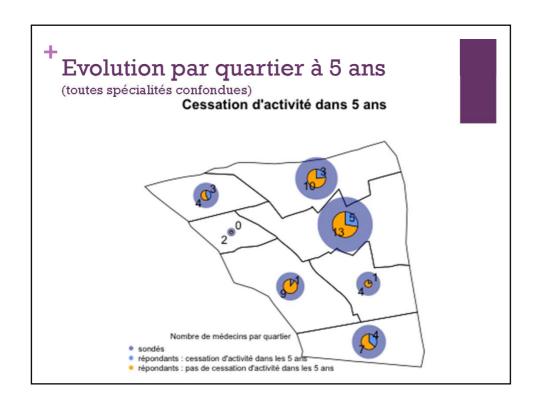

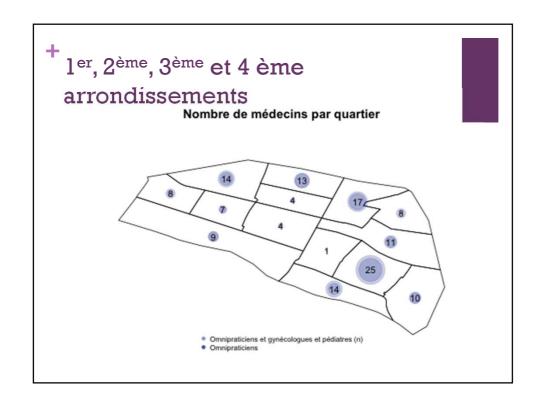

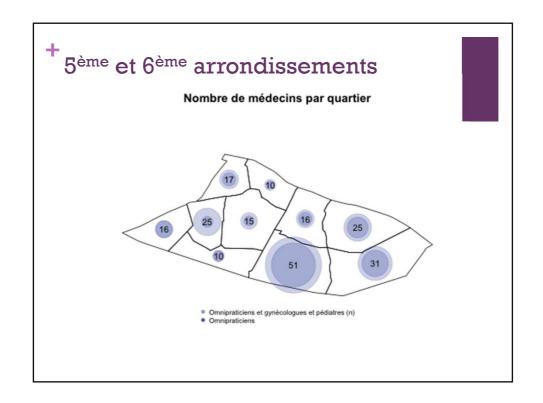

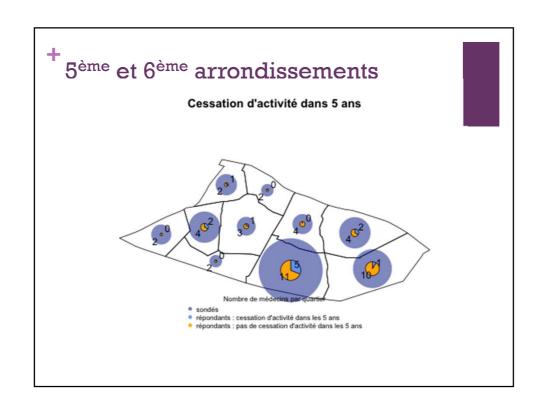

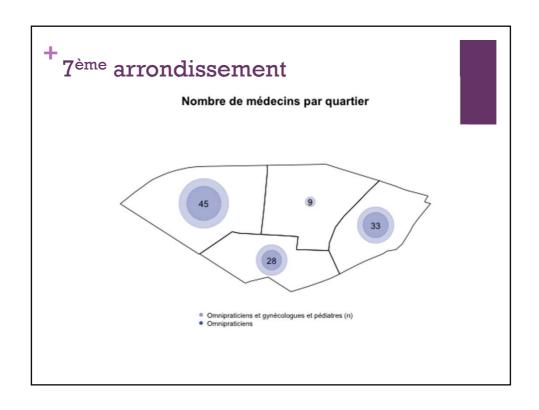

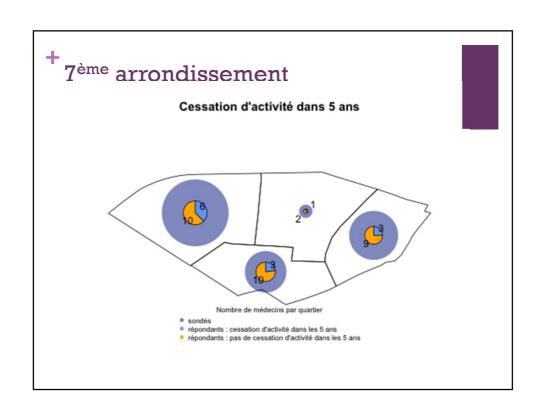

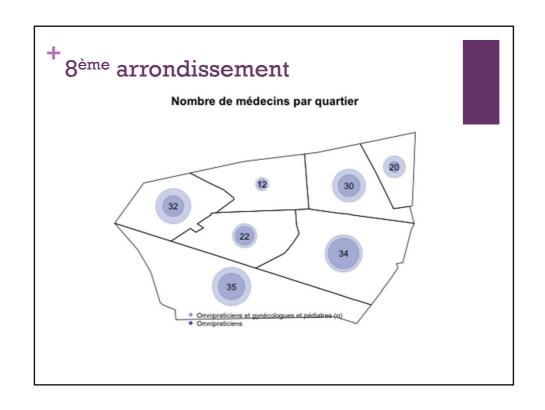

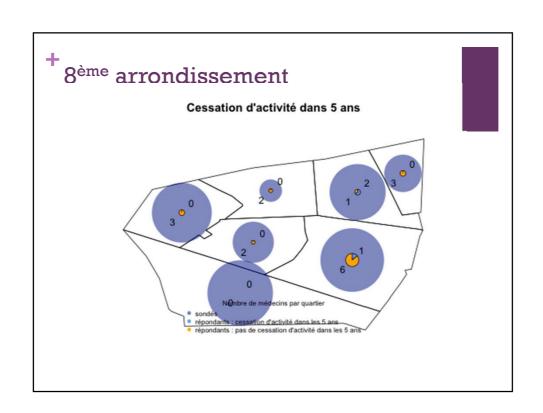

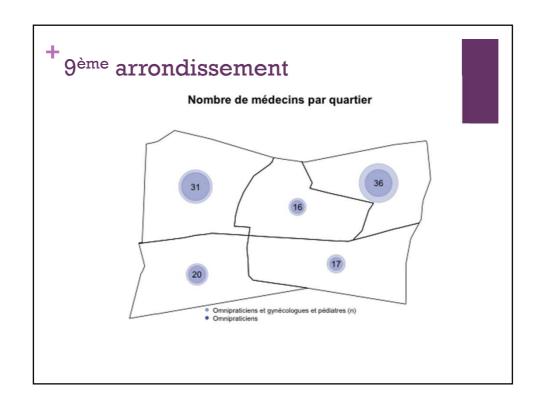

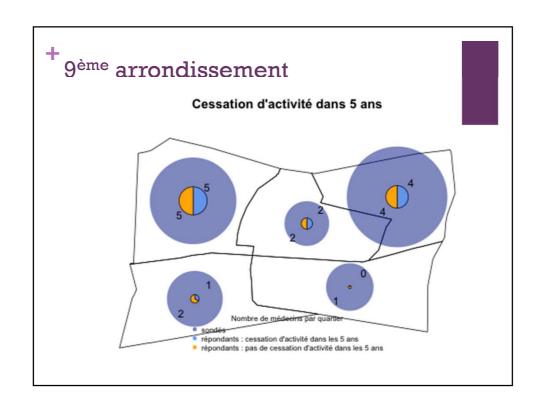

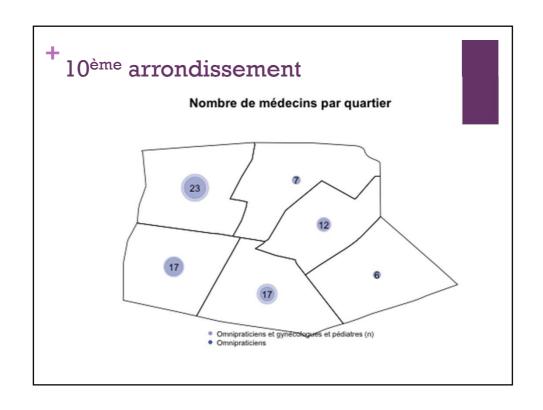

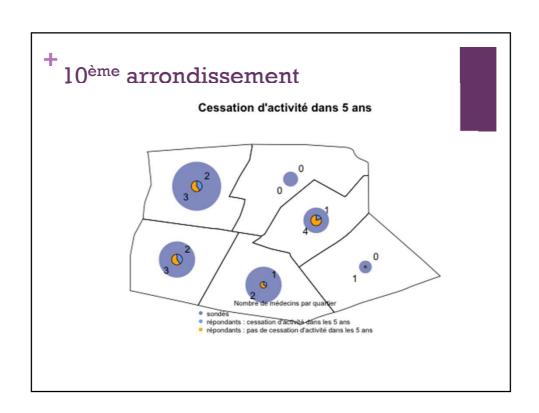

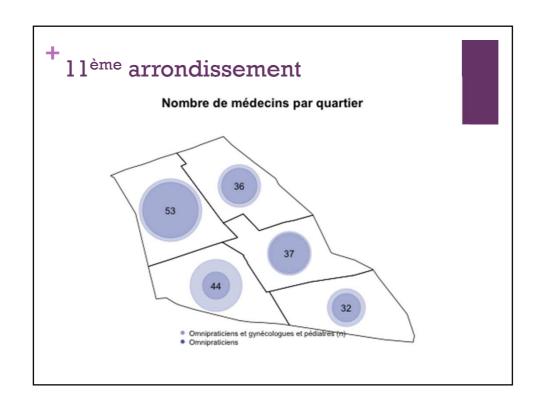

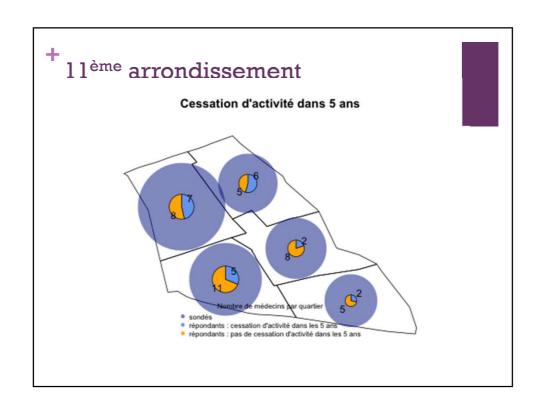

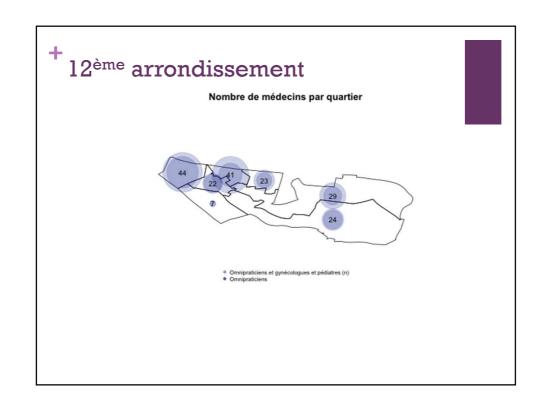

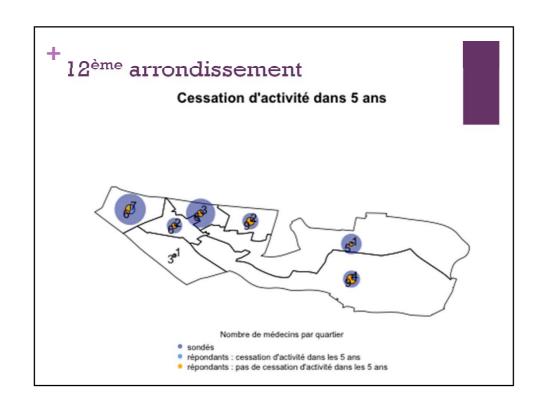

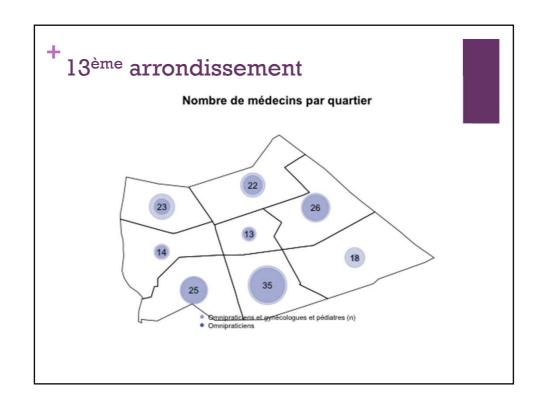

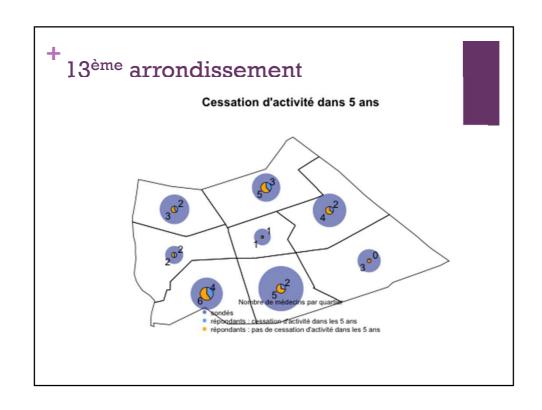

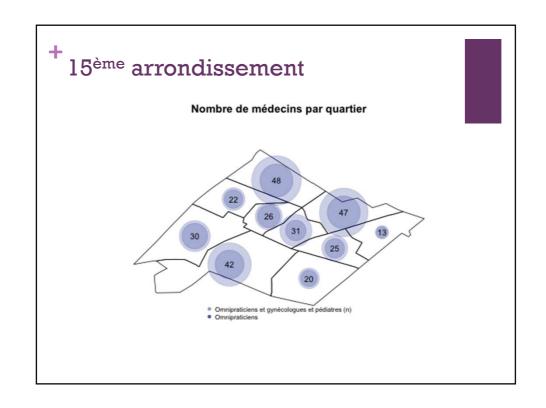

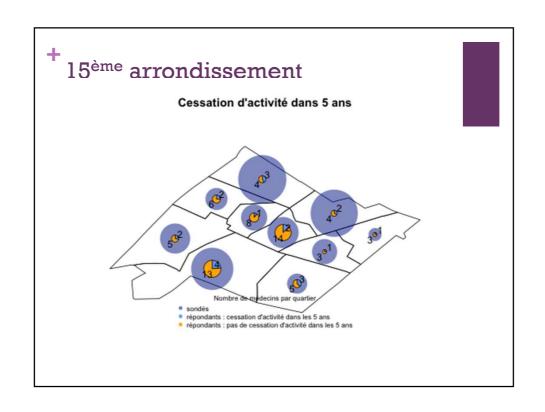

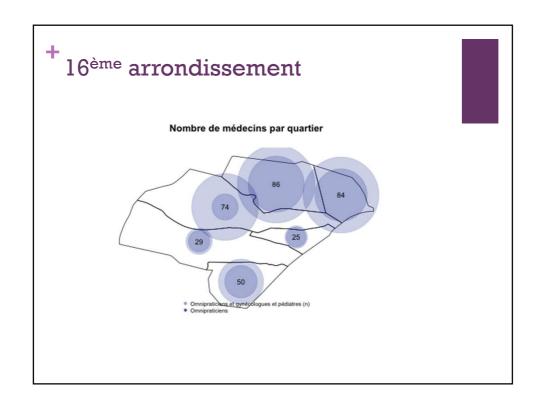

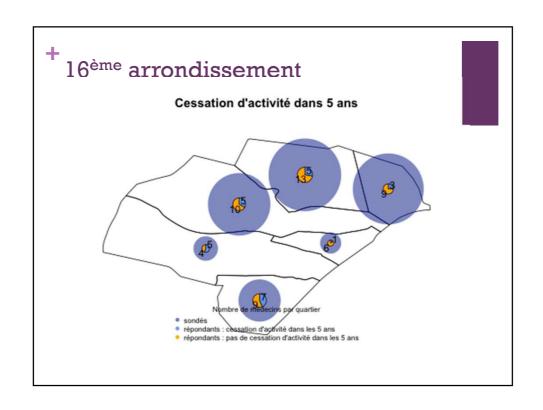

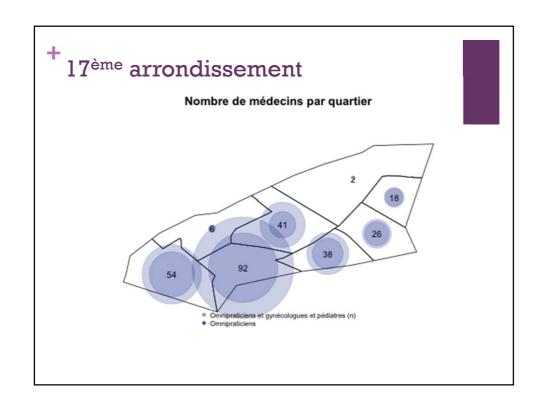

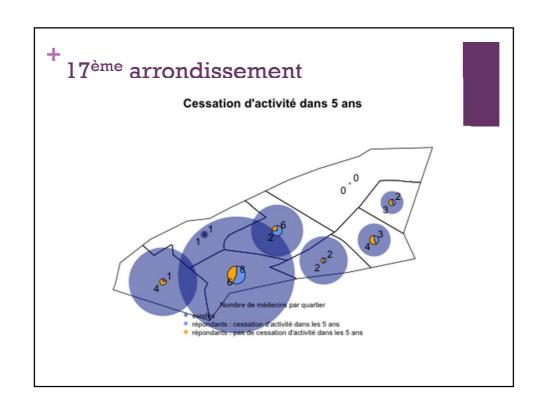

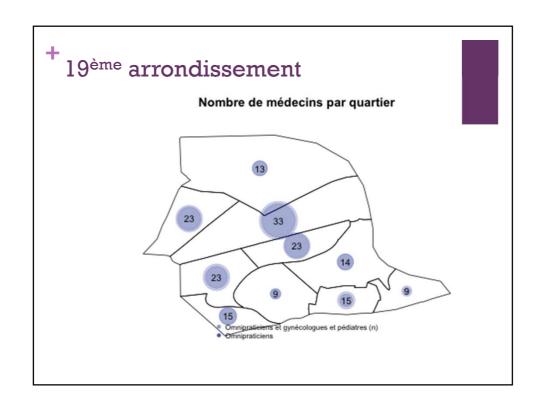

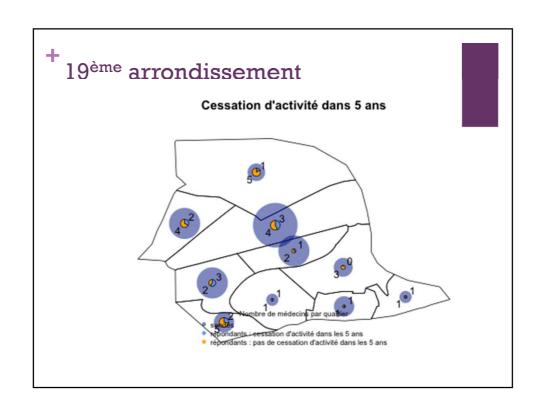

+ Conclusion

- Enquête non exhaustive mais vraisemblablement non biaisée
- Situation actuelle:
 - Hétérogénéité de densité médicale entre arrondissements / entre quartiers
 - Importance des MEP chez les omnipraticiens
- Evolution prévisible préoccupante de l'offre de soins primaires libérale à Paris mais
 - Enquête déclarative
 - Variable d'un arrondissement à l'autre, semble plus marqué dans arrondissements sur-denses
 - Profil de médecins prévoyant de cesser leur activité : spécialistes, secteur 2, peu d'actes
- TRAVAIL ENCORE EN COURS PAR ARRONDISSEMENT, à suivre
